14 September 1973

MEMORANDUM FOR: Raymond B. Firehock
United States Arms Control and Disarmament Agency

25X1A

THROUGH : [REDACTED] Contract Monitor, CIA/OWI

SUBJECT : Photographic Coverage Data on Selected
Areas and Installations Pertinent to MBFR
Monitoring

REFERENCE : TCS-38695-73, dated 6 August 1973

1. In response to your request, the photographic coverage data
of [REDACTED] as listed under Attachments
below, is forwarded for your use. A computer listing of appropriate
targets was supplied previously to you.

2. With respect to some portions of the data, several caveats
must apply:

a. The interpretability rating scale used during
the missions of concern was a preliminary version; the
scale is currently undergoing modification and testing
and is being altered in the process.

The rating data and plots are therefore "For Background Use Only." It would be inappropriate to draw any firm conclusions from these data or to cite them specifically in any report. They have been provided, however, to give you an appreciation of the type of capability that will be available in the near future.

3. The computer listings have been annotated where appropriate in explanation of the data.

4. With respect to target coverage, the definitions of interpretability are:

a. Excellent. Suitable for interpretation to answer requirements on a given type of target in complete detail.

b. Good. Suitable for interpretation to answer requirements on a given type of target in considerable detail.

c. Fair. Suitable for interpretation to answer requirements on a given type of target, but with only average detail.

d. Poor. Unsuitable for interpretation to adequately answer requirements on a given type of target.

As we have discussed, you are aware of the pitfalls attendant to any straightforward interpolation of these interpretability data.

5. Please get in touch if I can be of any further assistance.
